ABOUT US

PLAY MATTER

Play is a fundamental part of childhood, helping children develop physical skills like strength, coordination and balance while also nurturing their sense of self, imagination and social ability.

Play doesn't stop when we reach school age; it is how children extend themselves socially and physically while building their confidence and self-worth. Children's physical and developmental needs evolve as they grow and mature; so too should their play options (even when play isn't "cool" anymore).

Playscape Creations' unique design methodology takes an holistic approach to childhood development, ensuring there are almost unlimited opportunities for children to build their skills and ability through play.

UNSTRUCTURED

Play experiences that are led by the individual child and allow them to access and interact in the way that best suits their needs

NATURE INSPIRED

Inspired by nature, re-imagined for public environments to give everyone green space accessibility and enjoyment

QUALITY & DURABILITY

Designed to last in the Australian environment, with designs and equipment that will stand the test of time

ERS

Supporting each child's need to play, learn and socialise in a safe and inclusive environment, we help you create the perfect playspace to suit your local communities' needs or your school's unique pedagogy. Our range of play systems provide a robust and low-maintenance community asset, specifically created to suit all Australian environmental conditions

With more than 20 years' experience creating engaging educational and recreational playspaces across Australia, we offer you our team's expertise to create the ideal play environment for your community.

YOUR LOCAL PARTNER

We are proud to offer equipment and play solutions that are suited to the Australian environment; robust, durable and FUN!

FAST DELIVERY

Don't wait 20+ weeks. All equipment in this catalogue is available for fast delivery.

4 weeks**

QLD-BASED BUSINESS

Proudly family-owned QLD business supporting local manufacture and quality UK imports

LOCAL PARTS & SERVICE

Your warranties, parts and service availability are local for fast contact and turnaround.

FAST DELIVERY

PLAY SYSTEMS

These systems are packed with play value; but not simply because they offer an incredible number of different play features. With non-prescribed entry and exit points and the ability to move any way they choose, children can use these systems in an almost infinite number of ways.

As multi-level play pieces, these systems provide play opportunities for children of all ages and levels of daring. Elevated viewpoints allow for reflection and a reintegration of each child into their unique worldview. Positive social interaction occurs as children encourage each other to climb higher, play cooperatively or to simply hangout.

These systems also add aesthetic appeal for all users of the designed space; from parents and carers to casual passers by. This aesthetic appeal has the potential to attract and retain more users to a space, over-delivering on its original promise and investment.

MAXIMISE SPACE

MULTI-LEVEL PLAY & SCAFFOLDING RISK

FEATURES

- Play experience provided over 3 levels, with clear lines of sight into the tower
- Unlimited ways to travel through, across and interact with the play experiences
- Multiple points of access and pathways to prevent play traffic jams
- Exhilarating enclosed tube slide from a 3.3m high deck
- Risk is scaffolded across the system and can only be accessed by children with the appropriate skill level
- Focus on active play and building gross motor skills and challenging children to try new experiences
- Constructed from the highest quality, robust materials for minimal maintenance and maximum longevity

BE INSPIRED

MAKE YOUR PLAY EXPERIENCE STAND OUT

Designed to encourage play for children of all ages and abilities, this space includes a multitude of physical and sensory challenges to encourage children to explore and return to the park time and time again.

With a vibrant colour palette, a mix of active and exploratory play and interactive elements at every turn, this inter-generational space will attract users from near and far. The provision of ample seating to allow for safe hangout zones for children and carers encourages socialisation and community engagement.

MOVING PLAY

DEVELOP BALANCE AND MOTOR SKILLS

Spatial and physical movement through play is vital for development of muscle groups as well as sensory integration; moving the body in space, over, under and through, and perception of height and depth are all critical to a child's complete development and the integration of all the senses.

Activities such as spinning, rocking and swinging help develop balance, vision and hearing.

BE INSPIRED

MULTI-USER UNSTRUCTURED PLAY EXPERIENCE

The Arcturus system tests children's climbing skill and teaches them to assess risk and problem solve. The play challenges help to build strength, balance and coordination while providing for social interaction and multi-user play.

The provision of slide towers at different heights caters to children of different age groups and levels of daring, and the overhead climber encourages brachiation while building upper body strength.

ACTIVITY FOR OLDER KIDS

DESIGNING FOR AGES 8+

In a structured playground environment designed for younger children, more adventurous and older kids may actually place themselves at greater risk as they seek to inject some excitement and stimulation back into the activity, using the equipment in ways in which it was not designed.

A positive alternative to this is exposing children to carefully managed risks; allowing them to exercise their judgement in assessing risks themselves, building confidence, resilience and self-belief – qualities that are important for their eventual independence.

In general, children are acutely aware of their own skill level and competence; they will seek carers' or friends' assistance where needed to learn physical skills or use it as an opportunity to test their own limits and display their physical skills to others.

By offering an environment with a multitude of activities that are suitable for different age groups, we encourage children to explore and build their own challenge and ability without putting themselves or other users at risk.

SWINGING

Swinging provides a child's nervous system with a wealth of visual, vestibular and proprioceptive information. Children gain an understanding of how their body moves through space, the speed of movements they are comfortable with, and the motor planning necessary to resist or increase active movement.

The sensation of moving back and forth stimulates the vestibular system and helps children build spatial awareness from an early age; as a result swinging helps to build so many physical skills including balance, coordination and muscle strength.

SWINGS

@ SCHOOL

01 SOCIAL ACTIVITY

Swinging is a social activity; whether users are on separate swings on the same apparatus or they're swinging together on Basket swings, interacting with and encouraging each other.

02 ENCOURAGES COOPERATION

Sharing a much-loved playground experience encourages children to take turns and cooperate with each other to make sure everyone has a go; building empathy and a sense of social justice.

03 BUILDS SAFETY AWARENESS

Swinging provides the opportunity to learn timing, rhythm and sequencing to develop an understanding around traffic flows and intersections, speed and risk, helping to manage street crossings safely in the future.

04 ACTIVE MOOD BOOSTER

An unstructured, self-powered experience, swinging helps children build confidence and self-awareness as they test their own limits; boosting positive endorphins and helping improve focus.

NATURE INSPIRED

Unstructured play outdoors and in nature is fundamental to a full and healthy childhood.

Playscape Creations' unique nature inspired range, Rustik, has been born from our need to reconnect with nature in a way that is both sustainable and accessible to all. Using locally and sustainably sourced Australian hardwood timber, climbing nets and architecturally curved stainless-steel elements, we seek to create recreational spaces that consider every individual element and how they enhance each users experience of the space.

Using a proprietary sapwood removal process, we strip the log to uncover the True Wood, or Heartwood. This reveals the stunning grain of the timber and removes any future risk of the timber splitting or peeling. All fixings are rebated into the timber for maximum strength and the log is protected by multiple coats of Timber Treatment; a protective and preservative coating that provides a 'furniture' quality finish.

Over time, every timber log is enhanced by its own unique patina as hands lovingly polish the surface through play; the tactile experience encouraging interaction.

FEATURES

- Sustainably sourced Australian hardwood timber logs, between 200-400mm in diameter and up to 10m long
- Strong in-ground footings, protected with bitumen paint and total concrete encapsulation
- Minimal maintenance - a single re-coat every 12 months with water-based timber treatment
- Range of unstructured play opportunities, from climbing to balancing to hangout and reflection
- Delivered with a complete set of installation instructions, with Australia-wide delivery

100%

1 BELLTHORPE

The central play element in this design, the Bellthorpe, can accommodate up to 25 users and provides elevation and climbing challenges for children aged 5-12.

Price: 53,971

2 CARVED TOTEMS

Available in a variety of profiles, these timber totems are hand-carved by our artist to your specification and can be coloured. The final finish is protected by a clear, UV stabilised varnish.

Price: from 1,449 each

3 RUSTIK SWING

Stunning Australian Hardwood timber logs are linked by an epoxy painted steel support beam, with a range of swing seats available to suit your communities unique needs.

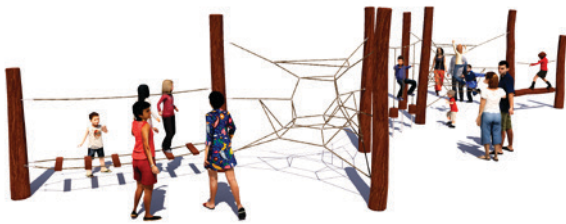

Price: from 5,696

INCLUSIVE PLAY

Inclusive play creates an environment sensitive to the needs of anyone who might use the space; providing a welcoming place where people feel comfortable yet challenged, and removing obstacles and barriers that prevent people of all ages, cultural backgrounds and abilities (both physical and mental) from participating. More than simply providing disabled access, inclusive play provides parallel play and social interaction opportunities to bring children of all abilities together.
