NATURAL PLAYSPACE DESIGN

Playscape
Creations

LEADERS RECREATIONAL INNOVATION

We are a specialist team thinking beyond the conventional to create unique, award winning recreational spaces to benefit children, families and communities across Australia.

Children are driven by their innate curiosity to grow and learn and explore. In the same way, the Playscape Creations team are driven by their curiosity; determined to give communities the opportunity to connect, learn and grow in a setting that responds to inter-generational needs.

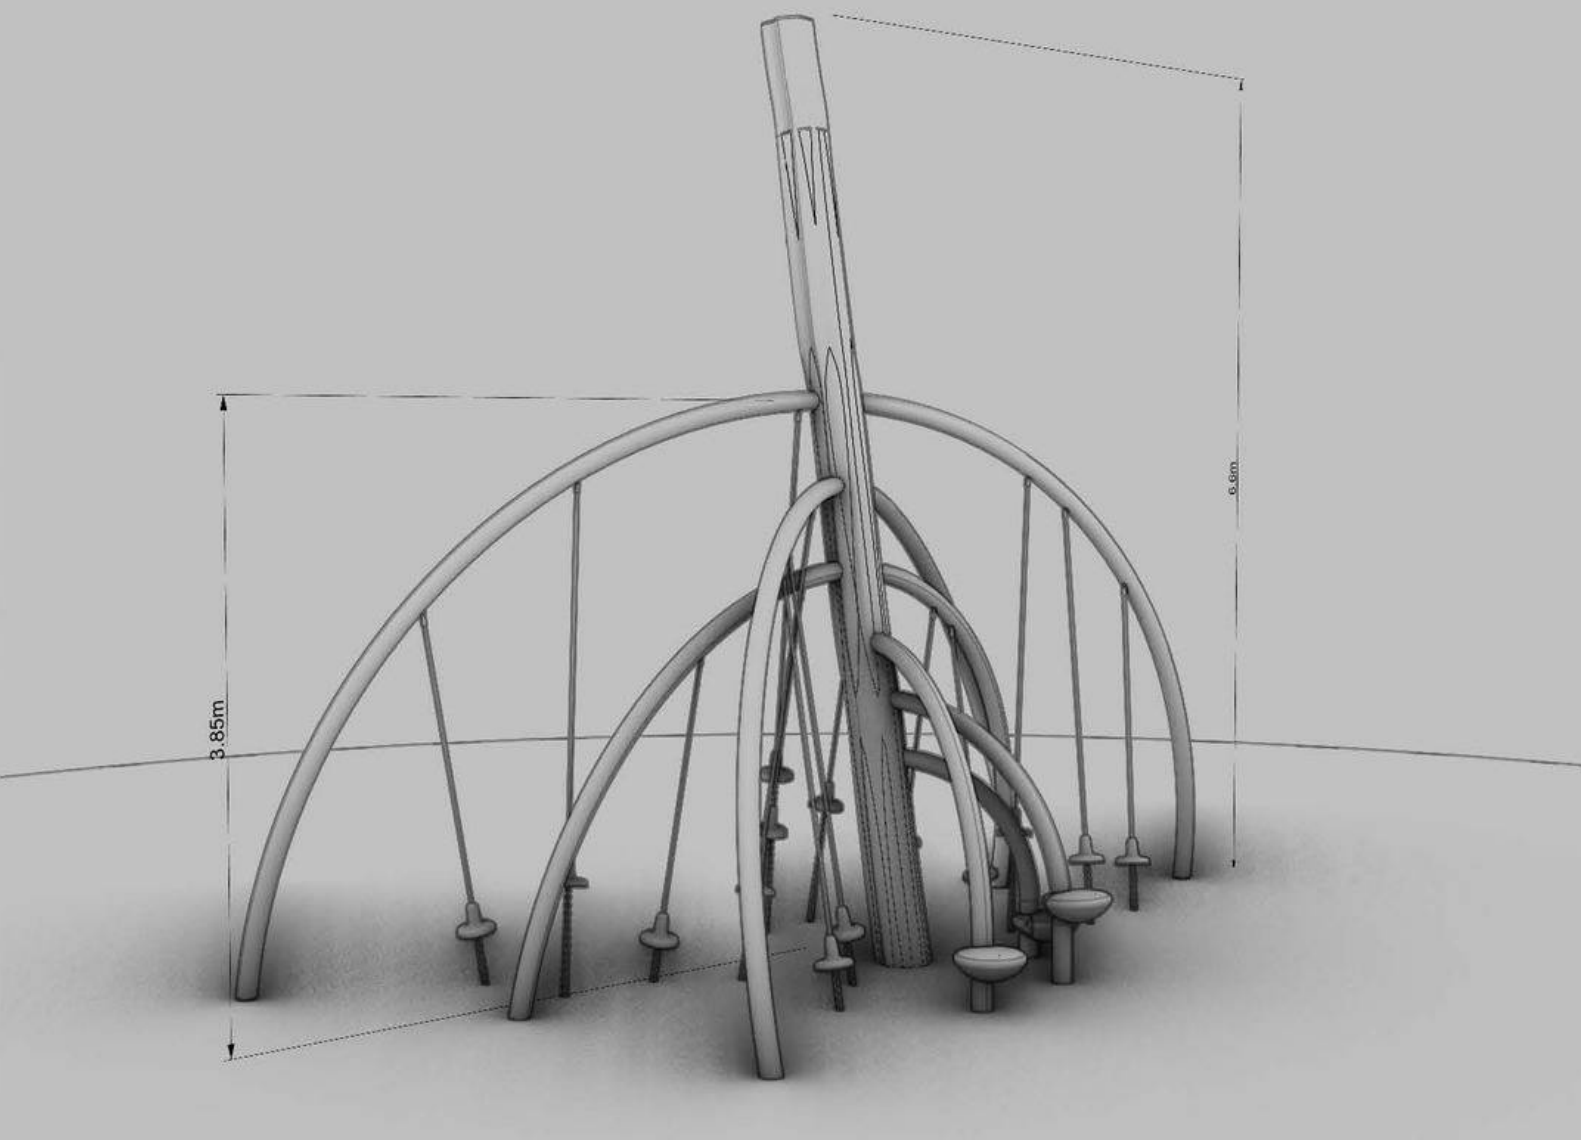

Offering you a full end to end design, engineering and construction service, our specialists work with you to create a site responsive design that respects your budget and brings your distinct vision to life.

As the leader in the design and construction of adventure, inter-generational and aquatic play environments, collaborate with us to create your unique recreational space.

Rustik™

NATURAL PLAYSPACE DESIGN

Rustik re-imagines nature play and the integration of natural elements into playscape design. Delivering environmentally sustainable sculptural elements brings refreshed innovation to playground design, integrating sustainably sourced Australian hardwood timbers with climbing nets and architectural stainless steel elements.

The Rustik Australian Hardwood is sourced from sustainable forestry resources as well as housing and commercial development sites. The timber used is generally unsuitable for standard timber processing so is up-cycled for recreational developments.

Structurally strong and aesthetically pleasing, these beautiful timbers carry a 15-year structural warranty to ensure they are a part of the community playspace for years to come.

Master-craftsman built on location, each Rustik unit is individually engineered to respond organically to the site and to suit each unique structural timber piece.

CRAFTSMAN BUILT

Several Rustik configurations incorporate stainless steel, offering a different visual and tactile experience for users. Low maintenance and incredibly durable, the stainless steel appears organically formed as part of the structure itself.

Created to encourage non-prescribed play, each of the Rustik pieces offers an array of climbing, height and exploration opportunities, allowing multiple children to build their strength and skill in a socially inclusive environment.

We are proud to be able to re-integrate these unique pieces back into the Australian landscape in an environmentally responsible way.

RECOVERED

The Rustik Australian hardwood is recovered from high-quality timber resources through development land clearing and sustainable forestry practices.

SUSTAINABLE

Although a time-consuming process, the timber has the sap wood (outer layer) removed to expose the heartwood, which is then sealed and coloured to reveal a beautifully finished, durable timber element.

UNIQUE

Structurally strong and aesthetically pleasing, every timber is unique. Multiple surface colours and finishes are available to enhance the natural grain.

Surface finish samples

TIMBER DETAIL

ENGINEERED

Footing details are individually engineered to respond to the site and the Geotechnical conditions of the soil.

PROTECTED

Timber footings are sealed with a black bitumen paint to prevent moisture ingress, increasing the longevity of the timber.

STRENGTH

The use of in-ground footings adds both compressive and tensile strength to the system with a direct bury then concrete pier or concrete strip beam.

FOOTING DETAIL

A large, complex wooden playground structure made of thick ropes and wooden beams, forming a geometric lattice. Several children are climbing and playing on the structure. The background shows tall pine trees and a clear sky.

Rustik™

TOWER SYSTEMS

CUSTOMISABLE

As every Rustik system is individually engineered to suit its unique timbers, complete systems can be customised and modified to incorporate towers, slides or multiple individual systems to create linear play pieces.

TALLAGANDA HUT

Developmental Benefits

Balance, Coordination, Proprioceptive, Core strength, Cooperative Play, Role Play

Site Required: 10.33m x 8.41m

FHOF: 2.8m

Max. Equip. Height: 5.47m

Ages: 5 - 12 Max. Users: 16

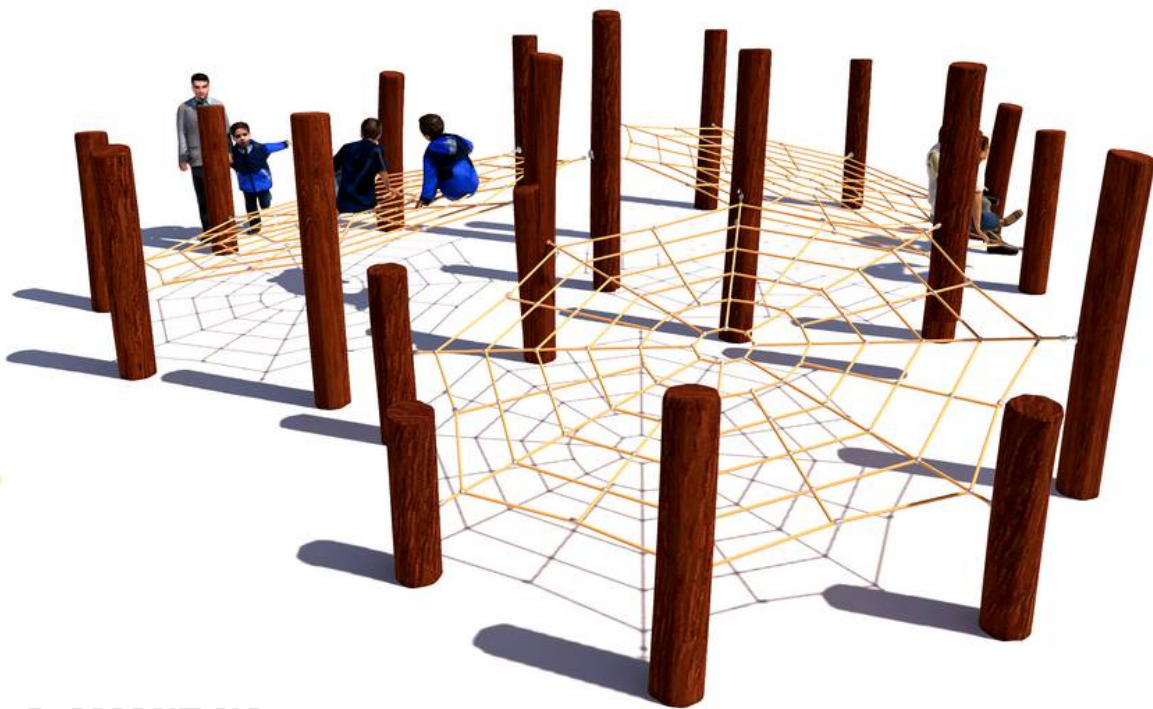

Budget: \$POA

WARRANTY

- **15-Year Performance Guarantee for Class 1 Sustainably Derived Australian Hardwood**
- **20-Year Limited Warranty for all steel columns against structural failure.**
This warranty does not include protective coatings or any cosmetic issues including wear and tear from normal use.
- **12-Month Limited Warranty on any rope part that shows premature wearing due to substandard manufacture of the ropes.**

Please note that the net must be maintained and periodically re-tensioned in accordance with the instruction manual supplied with the net. Normal Wear and Tear would include wear on the fibres of the net cables from users' shoes. Playscape Creations will repair or replace (at our discretion) any part which has a mechanical fault for the useable lifetime of the product.

This warranty does not include any cosmetic issues or wear and tear from normal use, nor from poor maintenance, neglect or misuse. Nor does it apply where damage is caused by Acts of Nature, such as severe storms, cyclones, floods, airborne debris, or ground movement.

Full warranty conditions are available on our website, playscapecreations.com.au and will also be provided with each equipment sale.

INSPECTIONS AND MAINTENANCE

Although every precaution is taken in the preparation of the timber, it must be remembered that timber is a natural product, reactive to the climatic conditions to which it is exposed. To meet this demanding environment, it is imperative that timber is inspected regularly and maintained to ensure protective coatings are kept in premium condition.

We recommend undertaking the Rustik Inspection and Maintenance programme to ensure your playspace stays compliant with Australian Standards regulations and continues to be a stunning community asset for years to come.

INLAND

\$480 per Inspection

\$960 per Year

WHAT'S INCLUDED?

All structures will be washed down with the premium manufacturer specified detergent and pressure cleaned. Stainless Steel and Metal Components will be cleaned of environmental debris and treated with lanolin based corrosion protection.

Timber will be cleaned and inspected. Any splintered or damaged parts will be ground and sanded before applying a protective coating in accordance with manufacturer specifications. Cables will be inspected for tension, fraying and wear and tear and adjusted and re-tensioned as required.

If at any point during an inspection a warranty issue is identified, the inspection team will rectify immediately on-site or make safe until the appropriate parts can be ordered and installed – all at no additional cost.

After every inspection you will be issued with a comprehensive report that outlines all of the elements that were inspected, the inspector's findings, images and any maintenance or rectification works that were undertaken. These reports are essential to supporting your playground management system in compliance with legislation and the requirements of your warranty obligations.
